Scholarly Communications Newsletter - October 2021

Research Impact Areas and the Expert Gallery

With the development of Georgia Southern's [Research Impact Areas](#), we've enhanced the Expert Gallery to help match collaborators across the University. Faculty can now add one or more of the research impact areas as a research interest on the About page of their SelectedWorks profile. This will allow researchers to discover others with shared public impact research interests.

The more faculty that participate, the better the results will be! Contact [Digital Commons@Georgia Southern](mailto:DigitalCommons@GeorgiaSouthern) to **let us know which of the five research impact areas to add to your SelectedWorks profile**. If you haven't requested an update recently—or set up your SelectedWorks profile yet—send us your current CV to maximize your research impact.

▼ Sort by name (A-Z)

Cheryl L. Aasheim
Professor, Department of Information Technology, Allen E. Paulson College of Engineering and Computing

Disciplines
Computer Sciences, Databases and Information Systems

Research Interests
Information technology-Study and teaching, Big data, Data mining

Martha L. Abell
Professor, Department of Mathematical Sciences

Disciplines
Mathematics

Research Interests
Mathematics, Applied Mathematics, Interdisciplinary STEM

Ananta R. Acharya
Visiting Assistant Professor, Department of Physics, College of Science and Mathematics

Disciplines
Physics

Research Interests
Surface science, Group III/V semiconductors, AES

Atin Adhikari
Associate Professor of Environmental Health Sciences, Department of Biostatistics, Epidemiology and Environmental

Disciplines
Environmental Public Health

Research Interests
Environmental microbiology, Exposure assessment, Aerobiology

[Behavioral and Social Sciences, College of](#) (96)

Contact digitalcommons@georgiasouthern.edu share your research impact areas.

All of the University's [SelectedWorks](#) profiles are included in the [Expert Gallery](#). These professional, Georgia Southern-branded profiles provide scholarly information and publications with options to archive faculty work or link to it on other sites. SelectedWorks profiles organize and preserve faculty work, increase discoverability, and provide readership metrics that can be leveraged to **help demonstrate**

achievements for external funding applications, annual evaluations, and promotion & tenure. Additionally, research can be archived in Digital Commons and featured in our [Faculty Publications](#) and [Faculty Bookshelf](#) collections.

The Expert Gallery is a public-facing, searchable database organized by area of expertise. It showcases faculty scholarship at Georgia Southern by collecting faculty profiles in one place. The search box at the top can be used to find individual faculty or locate groups of faculty within a campus unit. The “Explore All Experts” link is great for browsing by facets such as research interest, college, or department.

Colleges and departments can help by encouraging faculty to send their CVs and public impact research interests to [DigitalCommons@Georgia Southern](mailto:DigitalCommons@GeorgiaSouthern.edu). To make it even easier, Deans and Department Chairs can collect and batch-send faculty CVs during annual evaluations.

Every SelectedWorks profile increases impact by building the audience for research, which in turn builds the scholarly reputation of Georgia Southern. Boosting Georgia Southern’s research visibility also attracts the best students and partnerships, since so many of our visitors to the repository discover it through search engines like Google and Google Scholar. Even better, **adding public impact research interests to faculty profiles improves opportunities to identify and connect with experts across campus.**

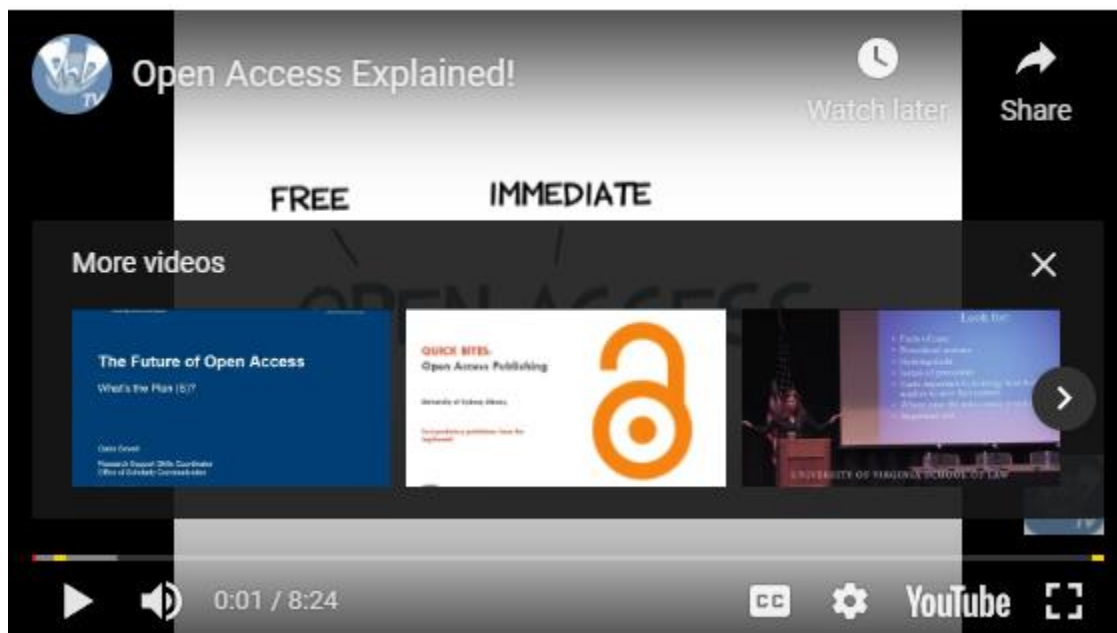

In short, send current CVs and public impact research interests to [Digital Commons@Georgia Southern](mailto:DigitalCommons@GeorgiaSouthern). We'll update SelectedWorks profiles, which in turn increases the power of the Expert Gallery to match innovative collaborations to advance the Georgia Southern public impact research agenda.

The Libraries create and maintain SelectedWorks profiles for faculty with our turn-key service, Additional information is available on the Libraries' [Institutional Repository Services](#) guide. Complete this form to request a new or updated SelectedWorks profile, or contact us at digitalcommons@georgiasouthern with your public impact research interests.

Open Access Week

Open Access Week 2021 is October 25-31!

Why is open access so important for research?

For more information, news, and events, see our [Open Access Week 2021 guide](#)!

Here's the latest news from ICPSR:

Upcoming Webinars and Workshops:

- [Webinar: Finding Available Data Related to Sensitive Topics](#), Oct. 27, 2021 :00 pm ET: [[Register](#) here]
 - [NACDA Pre-Conference Workshop](#) at GSA (Gerontological Society of America) Virtual Conference, Nov. 10, 2021.
-

Check Out [Data Brunch](#): ICPSR's podcast

- Stories about data, the people who use, seek, or create data, and why you should care. From ICPSR, the world's largest social science data archive. Proudly recorded at the University of Michigan.
